NUMBER 47

Local Air Cadet Squadron Re-organized

Following three meetings of the active management of the School Board in discussion the Squadron changing from and study of the Cadet Squad Chairman Dr. Frank Hall and ron & other school matters, a his committee to the Raymond decision was reached Wednesday School Board, and the Chair day night in respect of a new man of the School Board will Commanding Officer for Ray- now have direct charge of the mond Air Cadet Squadron, No. Cadete squadron. A word of 110. praise is also due the Committee

After two years or more of effective and successful labor, I. Fitch, who has been C.O. of the local Squadron of Air Cadets, asked that he be relieved of this responsibility while still expressing a desire to aid in any way possible the work to which he has devoted so much time and effort.

Too much cannot be said in appreciation of the work that Mr. Kitchen has done with the boys. From the initial organization of the Squadron he has been on the job at all parades and has been ever anxious to improve the value of the training to the boys and make them all a credit to the Air Cadet work.

After due consideration of the matter the School Board chose L. J. Barker as C.O. of the Squadron, and this change will necessitate some changes in the other instructors of the work. These will be announced later.

This change has also resulted

Dr. and Mrs. Madill and the children enjoyed a week-end holiday in Calgary.

Mr. and Mrs. Alwyn Stone and Mrs. W. C. Stone.

Mr. and Mrs. Wit Hogue of Picture Butte spent the Easter week-end at the Wm. Hogue home here.

Sunday School Easter Program

Easter programs were held in both wards Sunday and very interesting and instructive programs were given, with good audiences present. In the 2nd Ward the following numbers were given:

Opening exercises and sacrament services were carried out as usual.

Easter Story—Maria Dahl. Talk by Gordon Scoville.

Mixed Quartette "He Died the Great Redeemer Died" Mesdames Emma Dahl and Scott Salmon, and Jos. McLean and Karl Gilmlech.

Talk on the Crucifixion of Christ and the Resurrection—Lyman H. Jacobs.

Scripture Reading—Mrs. J. H. Walker.

Congregational song—"Easter Morning."

Reading "The Handful of Clay"—Miss Iris Jones.

Vocal Solo—Miss Jeannine Wilde.

Talk on the Spirit of Easter—Pres. Melvin King.

IST WARD PROGRAM

Following is the Easter program carried out in the First Ward. Opening exercises and sacrament under the direction of the Superintendency.

Word picture of the Holy Land—Miss Bernice Litchfield. Talk on the Resurrection—T. T. Mendenhall.

Talk on Easter—Mrs. J. O. Hicken.

Double Mixed Quartette—F. R. Taylor and Co.

Vocal Solo—Miss Winnie Mitchell.

NEWS NOTES

Mrs. Eph. Hicks is having an addition built to her home on Broadway.

Bishop L. L. Palmer was at work again in the Post Office Friday after his attending General Conference in Salt Lake City.

Miss Freda Myatt of Magrath was amongst the recent graduating class at the C.W.A.C. training centre at Vermilion, Alberta.

A. W. Roddick is expecting notice of a transfer soon, and Mrs. Wm. Nalder is moving in to the home he has been occupying. Al's place in the Bank will be taken by Miss Chipman.

U. S. Army Engineers Win From Union Jacks

Despite the handicap of being short some of their regular players including stalwart

Beet Seeding General

Beet drills are busy this week in all parts of the district, the first drilling being done Monday of this week. While moisture is not abundant, there is sufficient that ground has worked up nicely and the beets are going into a very good seed bed. Germination will take place with present moisture but there will be no great growth until we either have rain or fields are irrigated.

Skies clouded over Wednesday and there were light showers of rain in the morning but the skies were generally clear in the afternoon. A cool wind blew Wednesday night, and a strong wind from the west prevailed most of Thursday.

About the same beet acreage will be contracted this year as last, viz. 20,000 acres, and with an average yield of ten tons or the district a harvest of 300,000 tons or more is looked for.

Nilsson and the fact that Raymond Union Jacks haven't done a sweat shirt for a month, the Jacks were able to hold the highly-rated U.S. Engineers of Edmonton to a 69-40 victory Thursday night.

Local fans are elated over the showing made by the handicapped Jacks who were fortunate in being able to use Bill Zabriskie of Raymond, Murdock and Buna of Lethridge and Mickleson of Stirling. As indicated on the tally sheet these players were in the scoring columns while Walker topped the Jacks with nine markers.

Gullickson, Ayres and Chamness were the outstanding players for the Yanks. This trio made a total of 55 points, with 'Sharkey' Gullickson bagging the pigskin to get 27 of these Raymond Jacks: Nalder 8, Evans 0, Walker 3, Murdock 4, Mickleson 5, Buna 4, Dunlop 0, Turner 4, Zabriskie 6. Total 40.

U.S. Engineers: Hara 1, Kroma 3, Murphy 0, Gullickson 27, Miller 5, Ayres 16 Smith 0, Phillips 6, Chamness 12. Total 69.

W. Sipe and W. Rolfson were in charge of the game. Exactly nine personal fouls were called on each team. — Lethbridge Herald.

"COMBINED OPERATIONS INCLUDE YOU"

● Invasion demands more action from every fighting service . . . combined operations. Combined operations include you, too.

Despite the shortage of help and equipment, Canadian farmers have responded nobly to demands for increased production of foods.

But there is one thing on which a better job can still be done.

MORE MONEY is needed to fight a more intensive war.

All Canadians will be asked to furnish this money. It's a duty that we who are at home owe to the men on the fighting fronts.

In these days most farmers have higher incomes . . . money to save. And that is the job that they are asked to do . . . save money and lend it to Canada.

You are not asked to give money . . . just to lend it. When the war is over you'll have this money to "plough back" into your farm. So save now to lend to your country. Save to have money to improve your farm; money for new stock and implements; money for more land or new buildings . . . for a new car . . . for new furnishings and conveniences for your home.

All you can lend is little enough for a cause so vital for a need so urgent. And the more that you can save and lend to your country now, the more you will have for your own use when the war ends.

AS YE SOW SO SHALL YE REAP

As seeding time arrives, the above few words from the Holy Book would be well for all of us to keep in mind. Despite seven seasons in the past, we are still prone to gamble on crops when it comes time to seed.

This applies to garden crops as well as field crops. Experience has shown that stubbled in grain as a rule is a losing proposition, and still, every spring when there is sufficient moisture thousands of acres of grain are 'stubbled in', and then all too often when the dry hot days of July come along this grain commences to wilt and die because of no sub soil moisture. These years when seed, fuel & labor costs are high, every effort should be made to safeguard every dollar expended in these things and one sure way would be to plant only good seed, and seed only on well summerfallowed land. What is true of this practice is true of many others. Gardeners should play safe with good seed in well prepared seed beds. We may beat the average occasion ally, but generally we reap what we sow and no more, and when we gamble with results we must expect disappointment and financial losses.

CONSCRIPT YOUR QUARTERS AND DOLLARS TO BUY WAR SAVINGS STAMPS.

WE'RE NOT THROUGH YET

PUT VICTORY FIRST

There is hard fighting—harder fighting ahead—than in all the previous years of the war. The sacrifices to be faced abroad and the self-denial at home must reach new peaks in the months to come.

It will not be enough to buy your regular amount of Victory Bonds. Buy extra bonds to match the extra effort we expect of our fighters.

BUY VICTORY BONDS

A. F. OF A. DIRECTORS in the Pacific Arena.

Calgary.—Labour for farming and its secondary industries, notably meat packing was under review during a meeting of the Board of Directors, Alberta Federation of Agriculture, April 6 and 7, and major action taken was representation made to the Prime Minister and the Minister of National Defense (Army), for a reconsideration of the entire status of the Canadian Defense Army now maintained

pointed to the constant shrinkage of the supply of available farm labour, a shrinkage which has necessitated use of German prisoners-of-war and Japanese civilians. They stated that in their opinion the older farm people now operating farms will be forced to reduce their volumes of production of several major farm commodities particularly dairy products and those from irrigated lands

Men of the R.A.F. Regiment pile of aircraft tails in a grave yard in Southern Italy, pitch their tent near a junk yard of J.U. 52 transports on

lines an added labour supply is tapped.

From the viewpoint of laymen, the directors stated, continued successes by the United Nations in the Pacific Arena made an attack against this country by Japanese extremely remote, if indeed possible at all and since the Pacific Coast defense force contains hundreds of men who are experienced and skilled in farm work, this reservoir of manpower, made available for non-military work, would materially aid in meeting the labour problem in other industries, particularly packing houses, as well as on farms.

Federation directors also requested the War-time Prices and Trade Board to designate an increased quota of the 1941 armament available for civilian use for the protection of farm animals and poultry and asked that the distribution of the available supply be made in such

a manner as will permit farmers at small centres to purchase on a basis of equality with those living near larger towns and cities.

The Federation will undertake a study of the establishing and operation of co-operative food lockers in rural areas.

Indicative of the growing support for the Alberta Federation of Agriculture throughout rural Alberta, the directors stated a substantial financial grant had been received from the Municipal District of Barons, No. 98, this action having been authorized at a recent ratepayers meeting.

Those in attendance at the meeting were: L. Hutchinson, Calgary, presiding; W. C. McKenzie, Lethbridge; P. Baker, Raymond; R. Scott, Tilley; N. F. Priestley, Calgary; J. Jackson, Irma; R. Gardiner, Calgary, and G. E. Church, Balzac.

Harold Janderson of the Royal Canadian Navy is returning to Halifax, this week-end after a month's leave at home with his mother.

NEWS NOTES

Miss Nellie Coyle & Harvey Forest of Vancouver, B. C., were week-end guests of Mr. and Mrs. S. B. Card, Jr. Miss Coyle is a sister of Mrs. Card.

Mrs. Sarah Shideler returned to her home in Cardston Monday evening after spending the week end in Raymond with her sister, Mrs. S. I. May.

The Stake Missionaries had two meetings last week. Friday night a business meeting was held at the Wm. A. Anderson home where plans for the summer missionary program were discussed, and Sunday evening at the Ira McBride home the group met in a study class. Refreshments were served by the ladies at both meetings.

SEEDTIME and HARVEST
By DR. K. W. NEATBY
Director
Line Elevators Farm Service

SHRUBS

"Ornamental Shrubs and Small Trees for the Canadian Prairies" is the title of a new bulletin just published by Line Elevators Farm Service. The author of this bulletin is Dr. S. W. Edgecombe, Associate Professor of Horticulture, University of Manitoba. It is a very attractive publication containing descriptions of over a hundred shrubs and it is beautifully illustrated.

Farmyards and school grounds in the Prairie Provinces are, too often, drab indeed. Shrub plantations are not difficult to establish and require comparatively little labour to maintain. This new bulletin includes the essential information on planting and care of shrubs and, also, on planning the shrubbery. The reader can, therefore, make an intelligent selection, and secure information on landscape design as well as on care and maintenance. A list of commercial nurseries is, also, included.

Copies of the bulletin may be obtained from Line Elevators grain buyers, or from Line Elevators Farm Service, 763 Grain Exchange Building, Winnipeg, or 505 Herald Building, Calgary. The distribution is free to farmers, country school students and their teachers. This will be a very valuable addition to the parcels of agricultural literature which go from Line Elevators Farm Service to country schools almost every day.

Income Tax Returns

FOR 1943 MUST BE IN NOT LATER THAN 30TH OF APRIL 1944

1. WHO MUST FILE RETURNS?

If you are single, and your income was over \$660.00—
Or, if married, and your income was over \$1,200.00—
Or if you had tax deducted in 1943—you must file returns.

2. WHAT FORMS TO USE

For income under \$3,000.00 use Form T.1 Special.
For income over \$3,000.00 use Form T.1 General.

3. WHERE YOU CAN GET FORMS

You can get income tax forms from—
1. Post Offices.
2. District Income Tax Offices.

Your early co-operation is requested. Over 2,000,000 Canadians will be filing income tax returns. You can help by getting your forms now, and mailing them promptly.

It is important that income tax returns be filed promptly. First, these returns must be filed to obtain credit for tax deductions. Second, to claim any refund to which you may be entitled. Third, to establish the Savings Portion of your tax, which will be paid back to you with interest after the War.

Make your returns now, but not later than 30th of April to avoid a penalty of 5% of your tax.

The unpaid balance of your 1943 tax may be paid any time before 31st of August WITHOUT PENALTY.

GET YOUR "T.4 SLIP" FROM YOUR EMPLOYER

To get a record of your 1943 earnings and tax deductions, ask your employer for a copy of the "T.4 Slip" he filed with the Government. Do this. It will save you time, and help prevent errors.

Farm for Victory**MACHINERY CO-OPERATIVES**

If someone offered to save you \$349.20 in the operating cost on 200 acres by a little delay and inconvenience on your part I am sure you would jump at the offer. Operators of small farms can save \$1.00 to \$3.00 per acre on operating costs by using machinery co-operatively with their neighbors. Yet co-operative use of machinery is the rare exception rather than the rule.

Most farmers take the attitude that when they want a machine to do a job they want right now. That is very nice, but it is a rather expensive luxury. There are many small farms that simply do not justify the cost which must go for interest depreciation and repairs on a complete line of machinery. Then there are many expensive machines which will suffice for several large farms but are too expensive or used too little for one man to own.

There are several types of neighbor co-operatives that have worked out well in Southern Alberta. The simplest is one in which two farmers who have approximately the same sized farm buy their line of machinery on a fifty-fifty basis. Another system is for each farmer to own part of the machinery and lend it to the other on a standard, custom work basis. The third is seldom used. It involves several farmers buying certain pieces of equipment which belong to the co-operative and not to any individual. As each uses the equipment he pays for it on a standard custom work basis. The fees going to repair the equipment and to replace it when worn out. This system works where a community buys some equipment like a tumble bug or bulldozer.

The first system has worked out very successfully in several

BAKING POWDER?

Buy the Tin with the Blue Ribbon on it!

Exchange your BLUE RIBBON COUPONS FOR WAR SAVINGS STAMPS

cases. Let me illustrate by an example. Two men who cultivate approximately 200 acres each decided to buy a line of machinery between them. They purchased a three-plow tractor, a 10-foot cultivator, 10-foot rodweeder, 20-run drill, 22-in. thresher, and 10-foot grain chopper. Each paid one-half the cost. All oil and repairs are paid for on a fifty-fifty basis.

Speedier War Movement with New C.P.R. Signal System

The new electric automatic-block signal system installed at a cost of more than \$1,100,000 between Chapleau and Schreiber on the Canadian Pacific Railway's Algoma district in northern Ontario ensures speedier and more effective operation of trains over these important 250 miles of single track. A typical yard installation pictured above is the east switch of the White River yard with Number Four (the Vancouver-Toronto) train leaving the station on the main line.

Installation cannot be over-estimated. The actual territory it serves is the White River subdivision, the 120 miles from Chapleau to White River, and the 120 miles from White River to Heron Bay. The wheels and rails automatically operate the signals in three colors—red (stop), yellow (stop at next signal) and green (proceed).

The new signal system represents the very latest development in this type of railway equipment, according to W. M. Neal, C.B.E., the vice-president, who made the announcement of the system's opening in March.

ADDRESSES ON THE MOVE...

IN SPITE OF ALL WAR HAZARDS

31,500,000 LETTERS**REACHED YOUR MEN OVERSEAS LAST YEAR**

Do you remember the "Change of Address" form which you filled out when you moved your civilian home? After that was filed at your local Post Office, every letter sent to your old address had to be redirected to the new one, and that went on until your correspondents were familiar with your new location.

Probably you didn't move very often, but each time you did, the Post Office gave redirectory service. And if you will think about that for a moment, you will begin to see what a stupendous task confronts the Canadian Postal Corps in handling the military mails, when thousands of men are being moved almost daily!

Yet, in spite of the need of tracing men from reinforcement units to their locations on fighting fronts... in spite of the need of tracing them through hospitalization... or while on leave... when their unit is moved... in spite of delays in air mail service caused by adverse flying conditions... of delays in surface transportation caused by enemy action...

in spite of every war hazard you can think of... your Post Office and the Canadian Postal Corps delivered 31,500,000 letters to men overseas in 1943!

It is inevitable that, in tracing men who have been moved, or wounded, some delays occur. It is inevitable that enemy action holds up delivery in some cases. But everything that human ingenuity and effort can do to give you a service that means speedier delivery of the letters your men are waiting for, is being well and thoroughly done, and will be done. New methods of speeding mail deliveries are being put into effect, new possibilities are being studied. Think of your own friends who have been posted to new locations overseas, and realize the task of tracing them when their mail arrives at their former address!

You can help your Post Office and the Canadian Postal Corps to give even better service if you will take a moment to make sure that your mail is correctly prepared. Do these simple things...

1. Always be sure each letter or parcel (properly packed) is fully and correctly addressed.
2. Use light-weight paper for regular Air Mail, or use the Armed Forces Air Letter Forms. Airgraph letters take a little longer because they must be processed in Canada and overseas.
3. To men in hospital, mark your letter "In Hospital", if you are advised to this effect.
4. Never put into parcels perishable food, or any substance that can be damaged by extremes of temperature.

**CANADA POST OFFICE**

Issued by the authority of
HON. W. P. MULOCK, K.C., M.P., POSTMASTER GENERAL

Each supplies his own fuel. The engine is filled with gasoline and serviced when one turns it over to the other, in rush seasons the outfit works for two days at a time at each place. In busy times when the tractor should be going full time the two operators take four-hour shifts.

This method is simple, requiring no bookwork, and those using it speak very highly of it. It saves dollars for each of the farmers.

Even on larger farms there are machines which are not used full time and can well be exchanged between farmers. This is often done on a custom rate basis. An extra tractor, hammer mill, blade weeder, or some such implements. Where one man owns each machine he lets it out to the other on a standard custom rate. This rate is based on current interest charges, depreciation, and upkeep. The rate is usually on an hourly basis but may be changed over to an acreage basis.

The basic cost rate (including depreciation, interest, repairs, upkeep, and risk) as set by the Swift Current Experimental Station, is as follows:
Tractor—3c. per hour for each \$100 of value when new
Seeding and harvesting machines—3c. per hour for each \$100 of value when new.
Tillage machines—12c. per hour for each \$100 of value when new.

To get the total custom charge, operating costs including fuel, oil, grease and labor must

be added.
Suppose two farmers use a tractor and combine jointly. A \$1600 tractor and the second with the first farmer owning a \$1,850 combine (new cost):

Basic Rate: Share of first farmer — .63 x 1600	\$0.48
100	

Basic Rate: Share of second farmer — .17 x 1850	\$3.14
100	\$3.62
per hour	

If each farmer supplies his own labor and fuel, the custom rate would be apportioned as above. The cost of fuel, oil, and grease, and labor on an hourly basis may be added to give the total hourly costs.

The above system of apportioning costs on co-operatively used machines, or for custom work is in wide usage in Saskatchewan. The system is flexible and can be adapted to almost any kind of a setup.

A circular explaining the system is available from Dominion Experimental Stations or District Agriculturists. It is Department of Agriculture circular No. 174.

Don't forget it will pay you to have all machinery in good repair and properly lubricated before it goes into the field.

W. R. Hanson,
District Agriculturist

YOUR GRASS FIELD for 1941 spring should increase this year's yield.

This is the time of the year Farmers who plan to increase for the dry land farmer to plan their grass acreage this spring his grass program for the coming year. Grazing should not be allowed on any fields that are to be used for hay. In fact, studies with crested wheatgrass have shown that extensive fall grazing materially reduces hay yields the following year. Reduction in yield by winter grazing has been found to be as much as 40 per cent and unless good moisture conditions prevail, the following hay crop may not be worth cutting.

When crested wheatgrass fields are seeded too heavily or become too thick, because of filling in, increased yields can be obtained by thinning the stand by cultivation. The one-way disc with every other disc removed has been found especially suitable for thinning old stands. The one way has also been used successfully with every disc cutting but care was taken to destroy no more than half the stand. Although late fall is the best time for this operation, a stroke in early

spring should confine their seeding to stubble land. It is essential that stubble or dead annual weeds are present to provide protection for the seedlings. If summer-fallow is the only land available, seeding should be postponed until fall. In this way grain and the grass seeded in the grain stubble in the fall.

When seeding grass in the spring, earliness is very important. Only by early seeding can the grass seedlings become well established before the arrival of the hot dry summer days. Spring seeding should be made as soon as the top inch of soil is free of frost. Experiments show that the most successful spring seedings are made before the middle of April.

Shallow seeding is essential if 100 per cent emergence of seedlings is to be obtained. Depth of seeding trials show that most grasses and legume should be seeded in the top one-half inch of soil and that seeding to

SUBSCRIBE to the RECORDER.

We hear that next summer bathing suits are going to be barely big enough to keep a girl from being tanned where she ought to be.—Ontario Milk Producer.

Messrs Martin, Nicholls and Epp of Condale and their wives were intersted visitors at the local Cheese Factory on Monday.

Mose Fromm, teacher of one of the 2nd Ward Deacons Quorums had his group to the Cardston Temple on Tuesday for baptismal work.

A depth of one inch or more greatly retards emergence. Usually no difficulty is experienced in seeding shallow on stubble land.

If the field is being seeded for hay, five pounds of crested wheatgrass seed per acre is sufficient. By stopping every other drill run, grass will be in rows 12 or 14 inches apart. This has been found especially suitable for hay production. Solid seedings made at the rate of 8 to 10 pounds per acre are more suitable for pasture.

HARBOR UNION MEETING explain just how far they are allowed to organize in this respect.

Raymond Factory Employees' Federal Union No. 118 held its regular meeting in the Town Hall Wednesday evening. April 10, 1941. 43 members were in attendance and Pres. W. S. Van Orman was in the Chair.

As there seems to be some misunderstanding regarding the bodies in the Town freedom extended to the British Columbia Japanese and particularly in regard to their longer hours to make up the gatherings at the Japanese normal weekly hours and make Church, it was decided to in Saturdays full holidays was accepted by the meeting after a report on the situation and brief discussion.

We Can Do Better

In the past, wars have brought with them a high cost of living, ending with inflation.

This sapped the strength of nations and added poverty and injustice to the other tragedies of war.

Later it has led to falling prices and unemployment.

In this war, we Canadians are determined to head off this danger.

We have done much to avoid a repetition of the disastrous price rises of previous wars.

We have paid higher taxes. We have bought Victory Bonds. We have severely limited profits.

We have put a ceiling on prices. And to make it possible to hold the ceiling, wages and salaries have been controlled.

In one way or another most increased costs have been absorbed and very few passed on to the consumer.

Holding the ceiling has been a struggle. But the results have been worth while. From 1914 to 1919 prices rose 60%. From 1939 to 1944 the rise has been only 18%.

This effort of the Canadian people has been successful enough to be noted in other countries.

But we must continue to hold the line. We need not let history repeat itself. We can do better.

We can all help—

By cutting down unnecessary spending, and buying Victory Bonds instead.

By not hoarding or buying in black markets.

By not taking advantage of the war situation to press claims for higher prices, higher wages, higher rents or higher profits.

(This advertisement is one of a series being issued by the Government of Canada to emphasize the importance of preventing a further increase in the cost of living now and deflation later.)

North-West Line Elevators Association

A Permanent Calendar

If you are conservative, don't read this. If you are interested in reform, read this and ask the nearest Line Elevator agent for the printed circular dealing more fully with the same subject. He can give you a calendar which may, perhaps, be adopted for world-wide use, and which will serve year after year from generation unto generation.

This new calendar, the adoption of which is proposed by the World Calendar Association, is simplicity itself. It would divide the year into four equal quarters of 91 days each. The first month of each quarter would have 31 days and the other two 30 days each.

The observant reader immediately objects that this leaves one day extra and two extra in Leap Year, and that would mean that in less than a couple of centuries, winter would be coming in the summer and summer in the winter. This problem is overcome by having a Year-End Day (called Y) between the last day of the old year and New Year's Day. This would be a world holiday. Leap Year would be given due recognition by means of a day called L between June 30 and July 1, and it, also, would be a world holiday.

If this new calendar is adopted, Christmas Day will always fall on a Monday, and your own birthday will always be on the same day of the week. We quote from the *American Scientist*: "This revised world calendar is balanced in structure, perpetual in form, harmonious in arrangement."

Line Elevator agents will gladly order extra copies for use in country schools.

Fire on Saturday afternoon destroyed the barn and out-buildings on the rear of the lot formerly owned by Chas. Walteon.

NEWS NOTES

Mrs. Arlo Palmer of Calgary spent the week-end with relatives and friends in Raymond.

Amongst the many service men and women home for the Easter holiday were: Miss Rowena McMullin, Gordon Dahl Harris Hall and Ken Baker of the Navy, Melvin Anderson and Rex Philert of the Army and Florian DeMeester, Jimmy Weaver, Merle Summers of the Air Force.

The Presidents of the 145 Quorum of Seventy furnished the speakers at the First Ward Sacrament meeting Sunday evening and Elders Louis Brandley, Wm. Anderson, John Allen and S. I. May of the Presidency, and T. T. Mendenhall a former President were speakers. A delightful program of music added to the enjoyment of the program.

A. E. Hancock went to Cardston Tuesday morning to bring his car home. Engine trouble developed last week on the way to Cardston and the car had to be left there for repairs.

A meeting of the Next of Kin organization was held in the Town Hall last night to complete committees and other details. A report will be carried next week.

Joe Christian received a deep cut in his knee recently which required medical attention. Our first aid classes, which have been held over a period of years, proved their worth in this case, as it was in the early hours of the morning when the accident occurred and Stanley Greep, a first aid student rendered first aid until Joe was taken to the Doctor. The Doctor commended the fine way the first aid was administered and the benefit it was to the injured man.

HANDLING THIS

YEAR'S FALLOW

It is not too early to decide how we are going to conduct this year's summer-fallow. For the past two years we have had heavy stubble to work with so it has been easy to preserve a trash cover on the surface to protect fallows from drifting or from water erosion. The 1943 stubble, however, is light on many fields so the problem of maintaining a trash cover is not so simple.

Cultivating such fields with a one-way disc, even once, is quite sure to bury most of the stubble and so eliminate the possibility of conserving a satisfactory trash cover. Those who have blade weeders, either of the straight or duck foot type can handle such fields without destroying much of the stubble. Where the fields are clean and the stubble not too heavy the ordinary duck foot cultivator can be used successfully. The common disc is the least desirable implement to use.

Another factor that should be considered is that fields should not be cultivated any more frequently than is necessary to keep the weeds from growing. All the information available supports the idea that cultivating land is not helpful in summer-fallowing unless it is needed to destroy weeds.

Due to the light stubble many summer-fallows this year are quite sure to have little trash left on them to furnish arequate protection. Such fields, unless the soil is sandy or cover crops are needed, can be protected best by ploughing them as the last operation. Usually this is done just before cutworm moths start to fly early in August. Ploughing as the last cultivation where insufficient trash has been left, is a simple practice that could be well followed much more extensively than it is in Southern Alberta. With all of our experience we still are too prone to think a few straws scattered over the surface of a dust mulch ploughless fallow will keep the field from blowing. Repeated examples of bad conditions of drifting on such fields prove the fallacy of such an idea. If late ploughing is not done on such fields or if the soil is sandy, listing is about the only

C. E. Allred and C. R. Wing returned on Tuesday from attending General Conference in Salt Lake City.

With the lovely afternoon last Saturday, many people from Raymond and other towns were in Lethbridge for the afternoon.

Under the direction of the Stake Missionaries a cottage meeting was held at the Kubota home Tuesday evening when a pleasant time was had in discussion of doctrinal points.

In two straight games the Edmonton Army U. S. Engineers defeated the Magrath Lions by decidedly one-sided scores to take the Alberta championship in Senior Basketball.

We would greatly appreciate reports of local events, club meetings, visits from friends and relatives, and other items that add to the interest of your paper. Call in or phone us at 24 or 30.

Due to ill health Mayor Douglas Miller, of Taber, who has served that town for a number of years and also as Chairman of the Hospital Board since it was organized has been forced to resign as Mayor.

Bishop and Mrs. J. H. Walker were speakers in the 2nd Ward Sunday evening and gave very interesting talks on Easter. A nice musical program with the talks made a very interesting meeting.

Mr. and Mrs. Nephi Christian have enjoyed visits from their daughter Barbara who works at the P. Burns Co. in Calgary who spent the Easter holidays here, and their son Guy, in the U.S. Forces who returned last week after a month's leave spent at home.

alternative. Fields that come to the end of the fallow year in a condition that makes them liable to drift should receive either the protection of ploughing or listing. It should be remembered that with such a light stubble this is a dangerous year for summer-fallows.

TEXACO CRATER is no ordinary lubricant... It clings tenaciously to moving parts, quieting gear noise... cushioning each tooth against excessive wear. It resists channelling, balling-up and throwing-off, definitely adding years to gear life.

Texaco Crater has no equal for the lubrication of chains and sprockets. Easily applied, it assures longer life for both sprocket and chain because it "stays put"—keeping out dirt, grit and other foreign matter, thus preventing cutting or scoring.

Check your equipment, today! Replace worn parts before they damage others. Then, to make sure of complete protection against costly wear or breakdowns, lubricate them with genuine Texaco Crater.
